An EMG gramophone with electric motor for playing 78 rpm records. In original unrestored condition. Not tested for electrical safety. I suspect that the horn originally measured 22 inches in diameter but over the years it has gone slightly oval now measures 21 inches horizontally and 23 inches vertically and has also developed a pronounced sag. The oak case is free from worm (the white spots you can see are paint which will clean off) however, the lid hinge screws are missing and the soundbox is incomplete therefore it is being sold as seen for spares or repairs. Prospective buyers should look closely at the high definition images in order to form their own opinion regarding the condition and ask any questions before bidding by contacting me on: . Cash on collection or cleared IBAN/BACS transfer only, IMPORTANT NOTICE: International bidders are welcome provided cleared payment is received by telegraphic/IBAN transfer prior to making their own arrangements for collection, packing and shipping.
